

Design executive, systems thinker, and builder with **20+ years** of experience across fintech, commerce, AI, and emerging ventures. I work at the intersection of product strategy, design, and go-to-market — leading 0→1 launches, enterprise platform transformations, and organisational scaling across the US and India. I've built and led teams from 3 to 60+, designed AI-native products before the category had a name, and consistently taken on roles where the design problem and the business problem were the same thing.

EXPERIENCE

Head of Design — Virtual Expert Platform

2023 – 2025

Intuit

- Led design for Intuit's AI-native Virtual Expert Platform — reimagining customer and expert experiences around agentic, low-touch operating model
- Led **inception, pilot, and GA of CRM** across all QuickBooks SKUs — first structured CRM offering for Intuit's SMB base
- Launched **appointment capabilities to 10K enterprise customers** at Intuit Enterprise Suite (July 2025), enabling B-to-C-to-C scheduling
- Restructured teams and workflows around AI-first architecture; replaced array of third-party solutions with unified end-to-end platform
- Designed foundational experiences for agentic AI handoffs — connecting customers with the right experts, managing expert operations, facilitating interactions autonomously

Group Product Design Manager — QuickBooks FP&A (0→1)

2021 – 2024

Intuit

Concurrently: Head of Design, QuickBooks Desktop & QuickBooks Online app/client

- Built QuickBooks Financial Planning & Analysis from inception through general availability — **first integrated planning product** in the QB ecosystem, launching within 6 months of inception
- Identified cashflow projection as the founding feature — addressing forward-looking predictability as the universal gap across all business stages and sizes

- **First at Intuit** to design AI-native components for generative and agentic systems — working through acceptability, explainability, and extendability before the patterns existed
- Created the segment map and business-stage framework (Germination → End Game) that shaped product strategy and SKU positioning
- Proposed new SKU strategy that influenced Intuit's enterprise tier, contributing directly to **Intuit Enterprise Suite**
- Led a deliberate small core team (Senior Designer, Content Designer, Researcher) — designed every day, tested every week, shipped every sprint

Design Manager III — Walmart.com & Assortment Platform

2020 – 2021

Walmart

One of 4 design leaders on Walmart.com funnel & 4th design leader in the box for Assortment & Merchandising (under Valerie Casey)

- **Walmart.com:** Owned search, typeahead, personalisation, PDP, bundles, help flows, and post-sale surfaces — designed GenAI search, geo-aware store mapping, Shop with Friends, and Blue App/Walmart+ consolidation during 3× COVID traffic surge
- **Assortment & Merchandising (0→1):** Investigated profound interdependence of demand, supply, pricing, and logistics — built 0→1 platform via design sprints, integrating disparate data into streamlined decision tools for buyers
- Reduced final assortment decision cycles from **3–5 weeks to 1.5 weeks**; 10% manual touchpoint reduction
- Contributed to Walmart+ onboarding design (launched Sept 2020, now **11M+ members**)

Head of Design, India Operations

2016 – 2024

Intuit · Walmart · [247].ai

- Led India design operations across three organisations — grew design teams from **17 to 62 designers** while running concurrent product leadership roles
- Established design as a viable career path in India's enterprise tech sector; ensured designers worked on real, independent products — not support or replication work
- At Intuit: seeded 50+ designers across product teams; convened and led **#D4** — Intuit India's design conference around "Design for Delight"
- Built talent pipelines, mentorship structures, and design culture that outlasted each tenure; several mentees moved into leadership roles and founded their own studios

Craft Leader — Conversational AI Platform

2014 – 2019

[247].ai

- Led platform unification of fragmented acquired products into a coherent **Customer Engagement Cloud** and Customer Acquisition Cloud on a unified data warehouse
- Built design system ground-up as shared language across previously isolated product teams; ran all organisation-wide design sprints
- Developed a **digital twin** to visualise enterprise migration paths — making the transition legible for leadership and customers alike
- Predated mainstream AI product discourse while designing for AI-human handoffs, agent-assisted operations, and multimodal customer engagement
